

HS-1077

corded call center headsets

The ideal work-tool for the modern office and call center

PRODUCT DESCRIPTION:

The HS-1077 is the most sought-after model in the hameco corded headset family. During development our goal was to create a headset which provides any call center or office environment with clear communication – without compromising quality. The product's features include crystal clear audio, a noise-cancelling microphone and hearing protection. The ear cushion is soft, comfortable and has received an easy to replace leatherette cushion. The microphone is protected by a foam cover, and the microphone boom arm and headband are adjustable. The QD jack found on the headset's cord can be connected to any landline or mobile phone, PC or laptop using the extension cable. The HS-1077 is a lightweight and comfortable headset which can be used continuously for up to 8 hours.

HS-1077D-GQD duo version

HS-1077M-GQD mono version

Logistical information

Net weight	60/85g (mono/duo)
Gross weight	140/165g (mono/duo)
